

# The steel industry's pathways to decarbonisation

G. Lannoo

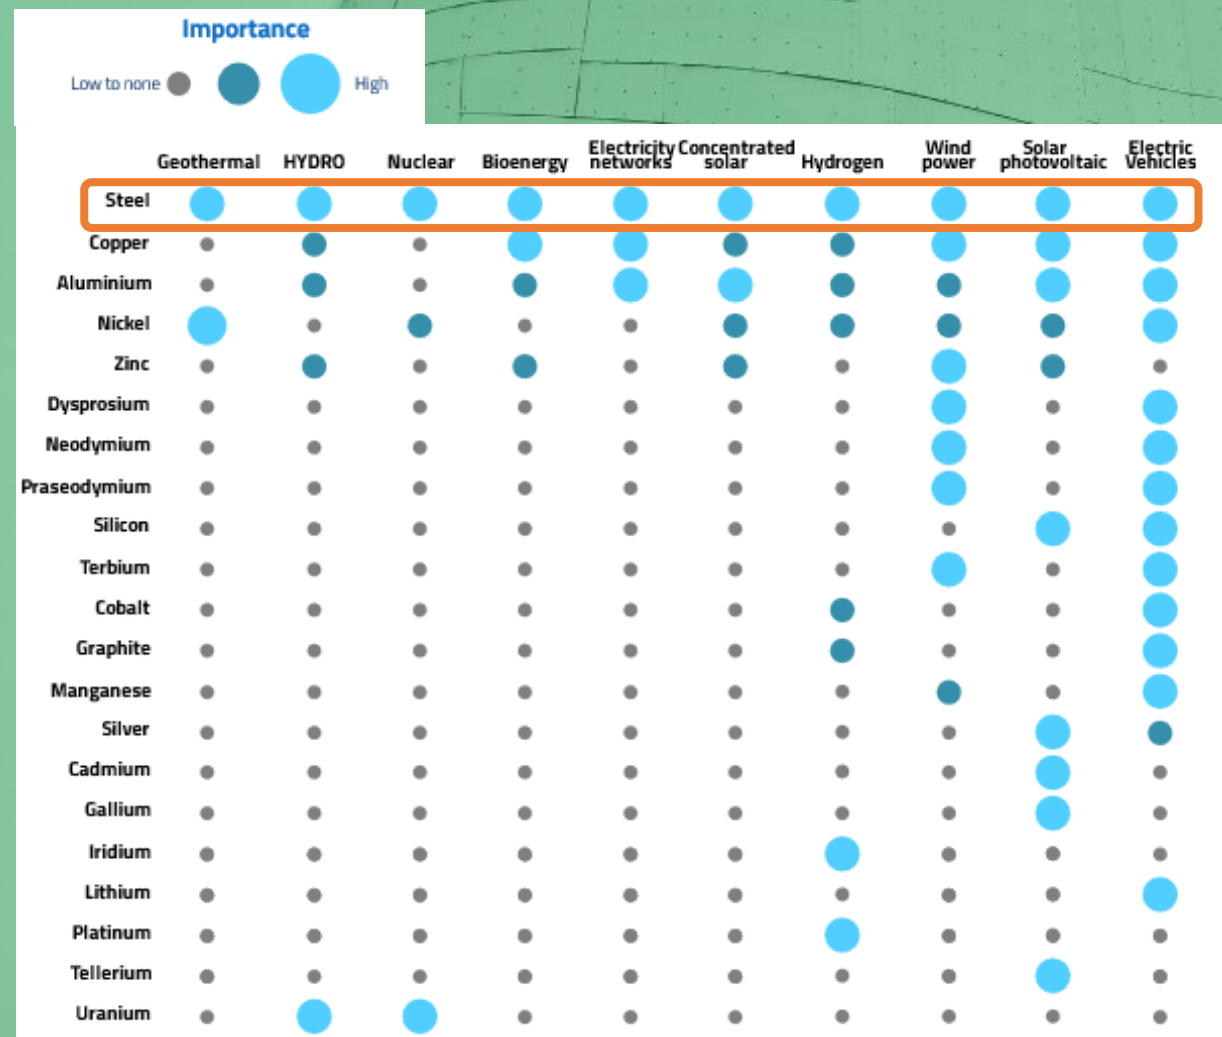

EU INDTech 2025 – Krakow Poland, June 2<sup>nd</sup> 2025

**Research & Innovation for Clean Industrial Deal**

# Steel

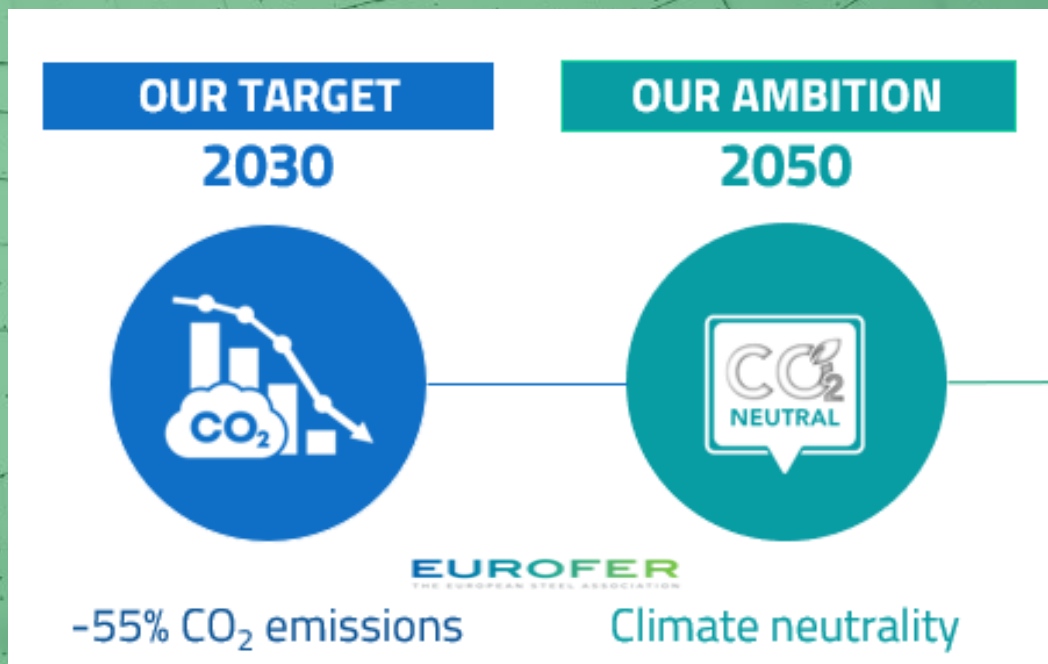

Essential to the green, resilient economy and the EU's strategic autonomy

- ✓ Steel : **backbone of EU** : annual production 126Miot/y – 2.5Mio jobs
- ✓ Steel industry: 20-25% of industrial **CO<sub>2</sub> emissions**
- ✓ Steel is **100% recyclable & the most recycled** material in the world (85% in EU)
- ✓ **Innovation** : 3500 types, 75% developped in the last 25 years

# Decarbonisation in steel sector

While remaining competitive !

# Pathways for decarbonisation

# Research & innovation for CID

A **complete & unique** set of tools, from low to high TRL

High **involvement of industry (RFCS)** → industrial implementation & impact

Co-funded by  
the European Union

**RFCS**

→ TRL 4/5

50-60% funding

**CSP**

→ TRL 7

60-100% funding

**RFCS big ticket**

→ TRL 8

50% funding

**Innovation fund**

Funded by  
the European Union

Regional & national and private funding

50-70 active steel  
projects

Research Fund for Coal and Steel

A summary of the findings of  
the Steel Research Technical Groups - 2023

Horizon Europe

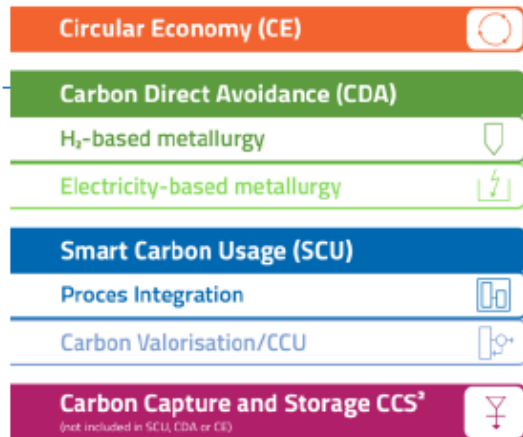

RFCS

For a better future

## Example: key low-CO<sub>2</sub> projects of the EU steel industry

- **60** projects
- Potential CO<sub>2</sub> abatement in 2030: **81.5 Mio tons/year** (over 1/3 of current direct and indirect CO<sub>2</sub> emissions)
- **Capex** needs: **31 bn** EUR
- **Opex** needs: **54 bn** EUR
- **Energy** needs in 2030: **165 TWh** electricity, of which **90 TWh for hydrogen** production (2.12 Mio tons) via water electrolysis

# EU is leading the decarbonisation

Source : Primetals

## To maintain this leadership

**Sustainable decarbonisation** goes beyond technology innovation and needs

- Availability of affordable green electricity & H2
- Effective CBAM & trade measures
- Availability of scrap
- Market for 'Green Steel'
- A continuous, predictable support for research

# THANK YOU
